

Delegation to the Brazilian green hydrogen ecosystem

About the delegation

This delegation aims to enhance bilateral cooperation between Germany and Brazil, as well as to foster technological development in the Brazilian Green Hydrogen market. This is an initiative from the German-Brazilian Chamber of São Paulo, in collaboration with NürnbergMesse, Guia Marítimo, and Hiria, and with the support of the Representation of the State of Bavaria in

Brazil. Exploring the Brazilian green hydrogen sector, the delegation will primarily focus on providing insights into the **Green Hydrogen value chain**, featuring visits to practical case studies and companies that promote application solutions, networking events, and showcasing new and innovative technologies within the sector.

Target audience

Decision makers and experts from business, politics, science, technology and innovation who seek new opportunities in the Green Hydrogen innovation ecosystem in Brazil.

Summary of the immersion

Date: October 16th to 20th – 5 days of immersion (3 days of visits, including the different segments of the hydrogen value chain (production, logistics and application), and 2 days of participation in the Hydrogen Dialogue Latin America event in São Paulo).

Fee: € 3.250, which includes technical visits to highly relevant companies, institutes and organizations; networking with companies, startups and investors; land transportation; lunch during technical visits; technical support and monitoring by the German-Brazilian Chamber team; simultaneous translation service; and digital certificate of participation.

Program

Days 1 and 2 (October 16th and 17th): meetings with entrepreneurs and local authorities, briefing visits with access to ongoing projects on Green Hydrogen, visits to a production and logistics hub and a Green Hydrogen production plant.

Days 3 and 4 (October 18th and 19th): Hydrogen Dialogue Latin America event, which will promote intense networking between producers, investors, scientists, logistics operators and large consumers of Green Hydrogen.

Day 5 (October 20th): visits to the main ongoing initiatives in São Paulo and a closing session with authorities on the Green Hydrogen ecosystem.
